

Oncology Ward

The works comprised of the construction of a two storey structure (Levels B & C) on top of an existing single storey building (Level A) which has been constructed to receive vertical expansion.

Level A contained clinical and staff areas which were in use throughout the works.

Level B contained general accommodation for use by the hospital.

Level C contained a 27 bed ward and associated accommodation. The new accommodations connects to the existing occupied accommodation on Levels B & C.

Mechanical plant was removed from the existing roof and new plant was provided on the roof of the external building. Adjacent hospital accommodation was in use 24/7 throughout the project.
