

# CARBON REDUCTION PLAN

Supplier Name: LST Partnership LLP t/a LST Projects.

Publication date: 9<sup>th</sup> February 2026

LST Projects is committed to achieving Net Zero emissions by 2050.

## Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions.

Baseline Year: 2023

Reporting period – 1st January 2023 – 31st December 2023

<b>Scope 1</b>		
73.49	t CO2e	Total (Tonnes)
<b>Scope 2</b>		
8.45	t CO2e	Total (Tonnes)
<b>Scope 3</b>		
49.3	t CO2e	Total (Tonnes)
<b>Total</b>		
131.24	t CO2e	Total Organisation Emissions

## Current Emissions Report

Reporting Year: 2025

Reporting Period – 1<sup>st</sup> January 2025 – 31<sup>st</sup> December 2025

<b>Scope 1</b>		
83.84	t CO2e	Total (Tonnes)
<b>Scope 2</b>		
12.34	t CO2e	Total (Tonnes)
<b>Scope 3</b>		
43.95	t CO2e	Total (Tonnes)
<b>Total</b>		
140.13	t CO2e	Total Organisation Emissions

The increase in Scope 1 emissions during 2025 was primarily driven by increased vehicle usage required to deliver major projects at Eton College (Eton), Royal Holloway University of London (Egham), Rikkyo School (Guildford) and Dorset County Hospital (Dorchester). Local Supply Chains were prioritised to minimise transport-related emissions and increase our social value on these projects.

## Emissions Reductions Target

- Reduce energy and fuel use by 20% by 2033.
- To reach NET Zero by 2050 we need to lower our emissions by 5.61 tCo2e each year.

Progress against these targets can be seen in the graph below:

### Carbon Reduction Projects

The following environmental management measures and projects have been completed or implemented since the 2023 baseline. The carbon emission reduction achieved by these schemes equate to an increase of 8.89 tCO2e and an increase of 6.77%ge against the 2023 baseline.

#### Completed Initiatives

- ISO 14001 Environmental Management implemented across our company and we are audited annually.
- All our fleet vehicles are either ultra-low emissions vehicles (ULEVs) or zero emissions vehicles (ZEVs).
- LED lighting and PIR controls installed in our office and site cabins.
- Digitised documentation where possible to reduce paper wastage.
- Recycling of office and construction waste.
- Use of Local Supply Chain to reduce travelling time and the delivery of materials where possible.
- As part of Carbon Neutral Britain we have offset our annual emissions through international certified carbon offsetting projects in Zambia (Household Solar Lighting), Maharashtra (Wind Power) and the Netherlands (Methane Capture and Power Generation).

#### Future Initiatives

- Encouragement of car sharing, cycle to work schemes, public transport and virtual meetings.
- Installation of solar panels at our head office.
- Energy-efficient boiler system at head office.
- Eco-welfare cabins on sites.
- Further EV transition.
- Sustainable design support.
- We are looking to change offset our Emissions through UK certified offsetting projects.

- As part of Carbon Neutral Britain we will look to offset our annual emissions through UK Climate Action projects such as Tree Planting, Hay Meadow Restoration and The Sea Grass Restoration.

This Carbon Reduction Plan has been completed in accordance with PPN 006 and associated guidance and reporting standards for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
