

CRAWLEY HOSPITAL YELLOW WING OUTPATIENTS DEPARTMENT

West Sussex Estates Partnership, on behalf of NHS Property Services, appointed LST Projects for landlord compliance works at Crawley Hospital's Yellow Wing outpatients department

LST handled stripping internal spaces, installing new mechanical and electrical systems, ceilings, flooring, doors, and redecorating

To minimise disruption, a temporary space was created for the department, allowing operations to continue. Environmental impact was reduced with a waste management plan focused on recycling and reuse

This contract builds on our extensive healthcare expertise and ability to work safely and efficiently in a live hospital environment. The location of this project required stringent measures to ensure the hospital, service providers and patients were not affected by the works, and that hygiene was prioritised. Infection control was paramount importance, which saw us implement rigorous site operating procedures

"The department looks lovely and both staff and patients have commented on the newly decorated department."
