

GUILLEMONT JUNIOR SCHOOL SENSORY LEARNING ENVIRONMENT

Client
Hampshire County
Council

Principal Designer
Hampshire County
Council

£671k

- We delivered a single-storey extension at Guillemont Junior School, providing a dedicated SEN and sensory facility for pupils with Autistic Spectrum Disorder
- The space includes a bespoke sensory room, small group room, meeting room, and an acoustically rated classroom with modern interactive technology. A fully landscaped, enclosed sensory garden offers a calm and secure outdoor setting tailored to a range of learning needs
- Working within a live school environment, we maintained clear separation between construction and teaching areas. Deliveries were scheduled outside peak times, and temporary access routes ensured the school operated safely throughout
- Internal remodelling, including works to the adjacent Speech, Language and Communication Needs classroom, was completed during the summer break to minimise disruption. The extension incorporates energy-efficient systems, including hybrid VES cooling units, alongside robust materials designed for long-term use
- External enhancements included upgraded footpaths, additional cycle parking, and new parking bay markings
- This project was procured in partnership with the Hampshire County Council Minor Works Framework
- The result is a modern, inclusive facility that enhances the learning experience while providing a safe and welcoming setting for every pupil
