Client
Bishopsgate School

Architect
Temple Ford

M&E Engineer
BFK/DSR

Structural Engineer
GAP Ltd

April 2025 - Dec 2025

£1.4m

- LST Projects delivered the conversion of Vickers Hall at Bishopsgate School, transforming an existing sports hall into a dedicated performing arts theatre
- The new theatre includes retractable seating for up to 340 people, a full audio-visual system, lighting grid, and acoustic treatments, allowing it to be used for performances, assemblies and events
- The theatre is now used by students and staff for performances and school activities, giving pupils the opportunity to take part in productions in a purpose-built setting. It also provides a shared space for staff, students and parents to come together
- Mechanical and electrical systems were upgraded throughout, alongside improvements to the foyer and external façade
- The project was delivered within a live school environment, with careful planning to minimise disruption
- The theatre improves the school's facilities and also creates opportunities for wider community use, supporting external theatre and cinema groups

"LST has once again delivered another fantastic space for the school, adding huge value to the school allowing us to put on performances, displays and exhibitions of both music and art. We are really appreciative of this space. It has transformed the old sports hall into an amazing theatre."
