

## **SOUTHERN COUNTIES VETERINARY SPECIALISTS FOREST CORNER FARM**

**Client**  
Southern County  
Veterinary Specialists

**Architect**  
Sheerin Bettle

Sep 2021 – Sep 2022

£4.3m

LST Projects built a new two-storey building for Southern Counties Veterinary Specialists (SCVS) in Forest Corner Farm.

Externally, the new structure was constructed with face brickwork, insulated cladding panels, timber featheredge cladding and a slate roof.

The space has added a new reception and waiting area, multiple consulting and treatment rooms, plus a dedicated area for SCVS's 200 staff.

We also adapted and extended a neighbouring unit with new gable ends, windows and doors installed by the team and complemented by hard and soft landscaping.

After completing the new buildings we also delivered the internal fit out to both properties including the installation of mechanical and electrical services, new ceilings, doors, floor coverings and decoration throughout.

"We are absolutely delighted with the facility they've built for us. The quality and finish of this building is exceptionally high. We've thoroughly enjoyed working with LST on this project and they've been extremely professional throughout the whole process right through from tender to completion of the entire project."

**Stephen Collins, Hospital Director,  
Forest Corner Farm, Southern Counties Veterinary Specialists**
