RSP

Feb 2025 - May 2025

£950,000

- LST Projects successfully completed the refurbishment of the Same Day Emergency Care (SDEC) department at Southampton General Hospital, on behalf of University Hospital Southampton NHS Foundation Trust.
- The project involved transforming an existing ward, previously comprising three large rooms, two treatment rooms, an anti-ligature space and supporting utility areas, into a modern, open-plan treatment facility.
- The completed department provides thirteen fully equipped patient bays, each with medical gas connections and essential patient services, creating a more efficient and flexible environment for emergency care.
- Works were delivered on a fast-track programme within a live hospital environment, requiring careful coordination, effective communication and precise planning to achieve a high-quality finish within a demanding timeframe.
- The refurbishment has enhanced patient flow and treatment efficiency, providing a purpose-built environment that supports the clinical team in delivering timely, high-quality emergency care.
- **Client Feedback**
  "The refurbishment of this space will significantly enhance the flow and efficiency of patient care from our emergency department. Huge thanks to LST for their outstanding work, collaboration and dedication in delivering a top-level finish within a tight deadline – a fantastic achievement."
  Paul Stansfield, Principal Project Manager, UHS Estates Ltd
